

Avaya 3904 Digital Deskphone

The ultimate command center

The 3904 Digital Deskphone is the ultimate command center for busy executives, managers, and administrators – anyone who needs maximum flexibility in a multiline phone. The 3904 Digital Deskphone sets a new standard for user empowerment, productivity, and low total cost of ownership.

Display-based interface – Simple, clean, efficient

The new display-based user interface helps increase your productivity by giving you access to more features with fewer keys. The 3904 Digital Deskphone's five-line by 24-character display – the largest in its

class – is bordered by programmable line/feature keys and interactive soft keys, providing access to the features you need – when you need them. The navigation cluster conveniently guides you through onscreen menus and prompts, providing an unparalleled level of customization and personalization.

Self-labeling keys – For fast, easy setup

All of the display-based keys are self-labeling, which puts an end to paper labels and time-consuming set designation. When the phone is plugged in, the display immediately shows the lines and features assigned to each key for convenient access. As new features and services are introduced or programming changes occur, key labels are automatically updated, further simplifying desktop management.

“Smart” Mute – Enhances privacy

Whether you're using the handset, handsfree speakerphone, or a headset, the Mute key always detects and mutes the correct path, helping you be sure your private comments stay private.

Directory services – Get connected quickly

The 3904 Digital Deskphone helps you find the names and numbers of the people you need to contact faster than ever. The phone's Personal Directory stores up to 100 entries and delivers convenient dial-by-name access. Adding names to the directory is a snap – you can instantly copy names and numbers from the Calling Line ID, Call Party Name Display, or the Call Log, as well as entering them through

the dial pad. For added convenience, the Personal Directory PC Utility further simplifies directory entry by creating the directory on your PC and downloading it to your 3904 Digital Deskphone.

Call Log - Call history at your fingertips

The new Call Log feature displays a list of the last 100 incoming calls to your phone as well as the last 20 outgoing calls made from your phone via the Redial List. You can customize this feature by listing all incoming calls or just the unanswered calls. And, you can instantly redial any call on the list with a simple keystroke.

Snap-in accessories - Add capabilities quickly and easily

The 3904 Digital Deskphone supports a variety of snap-in accessory cartridges providing the flexibility to add new features

and capabilities easily and cost effectively. For example, you can conveniently connect an analog device such as a fax machine, PC, or laptop modem directly through the phone. Full Duplex Handsfree is now available as a snap in accessory to Phase 3 3904 Digital Deskphone digital sets.

Expansion Modules - Add up to 44 more lines and features

With the addition of one or two 22-button Key-based Expansion Modules, the 3904 Digital Deskphone phone can accommodate up to 44 additional programmable keys supporting multiple line extensions or features such as Auto Dial. In addition, a Display-Based Expansion Module is available that can accommodate 24 self-labeled line extension or features on 3904 Digital Deskphone sets.

Investment protection

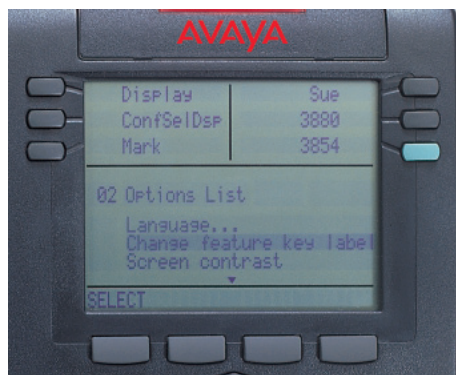

The 3900 Series Digital Deskphones series is designed to protect your investment by

keeping the future in mind as the portfolio continues to evolve, offering enhanced features and services.

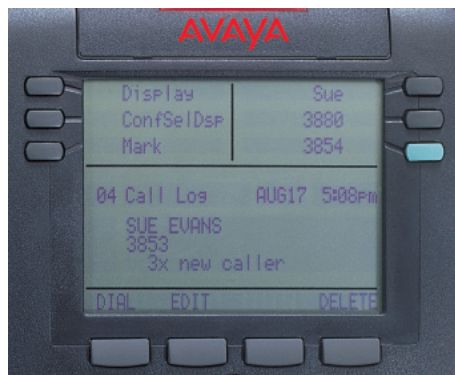

A galaxy of features

- Supports up to 12 lines; 56 with Key Module; 36 with Display Module
